

PROTECT ARIZONA TAXPAYERS ACT

The Protect Arizona Taxpayers Act will protect Arizona families from a potentially huge new tax burden. The Act will amend the Arizona Constitution to protect taxpayers from state and local governments imposing any new sales tax or use tax on services.

The Protect Arizona Taxpayers Act will protect Arizonans from new sales taxes on services that Arizonans use every day such as:

- Family Services: Childcare, veterinary services, health care, and tutoring.
- Health Care Services: Physicians, surgeons, nurses, physical therapists, dentists, eye doctors and counselors.
- Home Services: Construction, plumbing, lawn care, heating and air conditioning, installations and repairs, appraisals and inspection.
- Personal Services: Haircuts, manicures, tattoos, dry cleaning, car repairs and funerals.
- Professional Services: Banking, accounting, advertising, technical installations and real estate.

How would Arizonans be impacted by a service tax?

Sales taxes hit low-and middle-income families hardest. The Protect Arizona Taxpayers Act protects those who are least able to afford new taxes, including senior citizens, the disabled and others on fixed incomes.

Why now?

A new sales tax on services was recently proposed in the Arizona Legislature. Just this year the state of Illinois has discussed taxing services. Other states, such as North Carolina, Washington, and Oklahoma have started imposing new sales taxes on services this year. The threat is real because politicians often share bad ideas, and a sales tax on services is a bad idea for all Arizonans.

Why a Constitutional Amendment?

A constitutional amendment adds certainty that future Arizona politicians and bureaucrats cannot simply change or interpret the law to allow sales taxes on services.
